APPLICATION INFORMATION MATRIX

Major Residential and Other Development

Pursuant to Section 24 of the *Environmental Planning and Assessment Regulations 2021* and the NSW Department of Planning and Environment Application Requirements the details sought in the accompanying checklist must be provided. Failure to provide all required documentation at an acceptable standard will result in your application being returned.

Applicant signature: _____ Date: _____

● Information required	○ Information may be required (refer to Information Guide)				× Information not required			

Note. Council may require additional information to that listed in the matrix due to site constraints, unique development proposals and policy requirements. In addition, detailed assessment of your application may require the provision of additional information in accordance with Section 36 of the *Environmental Planning and Assessment Regulations 2021*. For advice contact Council on 9936 8100 or council@northsydney.nsw.gov.au.

Information Guide

Information	Requirements	When is the Information Required?
Notification Plan	One page at A4 including site and elevational plan with applicant and site details, true north, date, and architect. Required for developments that need public notification.	For all developments required to be notified in accordance with Council's Community Engagement Strategy.
Owner's Consent / Party Wall Consent / Strata Consent	Signed consent from all owners of the land (or strata/body corporate if applicable). Required for all applications.	For all developments.
Property Title	Titles and property certificates provide information about a specific parcel of land. Document is to include: Land ownership name (resisted proprietor), encumbrances, caveats and notices.	Refer to Matrix.
ASIC Search	An ASIC search is a search of the Australian Securities and Investments Commission (ASIC) registers used to verify a company's legal status and obtain information such as its ABN, registered office address, directors, company history, and other corporate records.	Refer to matrix. Required to support owner's consent.
Estimated Development Cost / Cost Summary Report	A genuine estimate of the development cost in accordance with Clause 6 of the *Environmental Planning and Assessment Regulations 2021*, Planning Circular PS 24-002 and in accordance with Councils Development Application Cost Summary	Refer to matrix
Statement of Environmental Effects	The statement must: • describe the site and development, • detail the development's consistency with all applicable legislation, environmental planning instruments and policies, • describe the likely environmental impacts of the development, and • describe how the development will mitigate the likely environmental impacts • undertake an assessment against the relevant legislation, including EPI's and the DCP	For all developments. SEE's must be prepared by a suitably qualified professional.
Clause 4.6 Variation Request	Where a proposal does not comply with the development standards in the *North Sydney Local Environmental Plan 2013*, Council may consider an exception where strict compliance is unreasonable or unnecessary.	Refer to Matrix.

Survey Plan	Prepared by a registered surveyor showing site boundaries and fencing, existing structures, RLs, easements, adjoining structures/heights, windows. Council's practice is to only consider survey's that are accurate and reflect existing site conditions. Historic surveys will not be accepted. Required for most developments except minor works.	Refer to Matrix.
BASIX Certificate	A certificate which certifies that the development will comply with the NSW Government's energy and water reduction targets subject to certain commitments. All BASIX commitments that the certificate states must be shown on the proposed plans for the development, and prepared in accordance with the requirements of the *State Environmental Planning Policy (Sustainable Buildings) 2022*.	For residential development excluding renovations to an existing dwelling with a value less than $50,000 and swimming pools or spas with a capacity less than 40,000 litres as per Schedule 7 Dictionary definitions within the *Environmental Planning and Assessment Regulation 2021*.
Site Plan	Must show site boundaries, contours, buildings/vegetation, removals, easements, driveways, dimensions and structures on boundaries. Required for all DAs.	For all developments.
Demolition Plan	A plan which details all buildings and structures to be demolished clouded / outlined in red. Cut and fill diagram showing any earthworks proposed.	For developments that include demolition.
Floor Plans	Show all levels, dimensions, room names, finished floor levels (RLs). Required where new work or buildings are proposed.	Refer to matrix. Existing and proposed plans must be provided.
Elevations and Sections	Required for all new buildings. Include all sides, RLs, roof heights and existing/proposed ground levels, cross sections and long sections included.	For all developments. Existing and proposed plans must be provided.
Site Coverage diagram and Floor Space Ratio diagram	Detailed site coverage, landscaped area and un-built upon area diagrams with existing and proposed calculations. Floor space ratio calculation diagram and non-residential floor space ratio calculation diagram for developments relying on *SEPP (Housing) 2021.*	Site coverage diagram for all developments. FSR and Non-FSR calculation diagram for residential, mixed-use and commercial developments where applicable.
Landscape Plans	A plan that outlines the proposed landscape design and treatment of outdoor spaces. It supports the integration of buildings with the surrounding environment and promotes sustainable, functional and visually appealing outcomes. The plan typically includes: • Existing vegetation to be retained or removed	Refer to Matrix.

	• Proposed planting (species, quantity, location and mature size) • Ground treatments (lawn, paving, mulch, etc.) • Tree protection measures • Fencing, retaining walls, bins, letterboxes, and open space areas • Finished surface levels and contours • Integration with stormwater systems and erosion control measures • Maintenance and management notes	
Shadow Diagrams	Required for multi-level developments or where solar compliance is unclear. Show 9am–3pm shadows on 21 June as existing and proposed. Hourly shadow diagrams between 9am – 3pm in plan view and 'view from the sun'.	For developments ≥ two storeys high that will impact upon surrounding residential development and residential developments where compliance with solar access requirements is unclear.
Materials and Colours Details	Required where new external works are proposed. Provide schedules and sample images	Refer to Matrix.
Stormwater Drainage Plan	A plan which shows the development's method of stormwater drainage and includes contours (to Australian Height Datum)	Refer to Matrix.
Erosion and Sedimentation Control Plan	Details how the site will be managed to prevent stormwater pollution, erosion and sedimentation.	Refer to Matrix.
Subdivision Plan	A plan which shows: • The site's boundaries, • Proposed lot boundaries, boundary lengths, lot areas and lot numbers, and areas subject to any existing and / or proposed easements, restrictions or covenants.	For developments that include subdivision.
Signage Details	A plan that outlines location, design, and size of all proposed signage. Should respond to site context and any heritage constraints.	For all developments that propose signage.
Access Report	A report which outlines how the development will comply with the accessibility requirements of the *Disability Discrimination Act 1992* and the National Construction Code. The report is to be prepared by a suitably qualified person and demonstrates how the proposed development provides easy access and useable areas for everyone.	For applications or constrained sites where the ability to comply without modifications is unclear.

Acoustic Report	A report that assesses the likely noise impacts of a proposal and recommends design solutions to ensure compliance with noise regulations and protect nearby sensitive receivers in accordance with the North Sydney Development Control Plan 2025.	For certain developments (refer to Matrix) near significant existing noise sources including major roads, railway lines and noisy developments. Also for certain developments (refer to matrix) that will potentially impact upon existing residential development and sensitive noise receivers.
Arborist Report	A report which assesses the impact of the development upon existing trees. This report assesses tree health and outlines the impact of development on trees, including impact from construction access. Any pruning required should be identified including the amount of pruning and the impact on the tree health. The report should include recommendations for retention or removal, and measures to mitigate impacts to trees during construction. The report must be prepared by an Arborist with a minimum Level 5 Diploma in Horticulture (Arboriculture) or AQF Level 5 in Arboriculture and $2 million professional indemnity insurance.	For developments that are likely to impact upon private and public trees in the North Sydney LGA.
BCA Report	A Report prepared by a certifier to confirm the building will comply with the National Construction Code performance requirements or justify any alternative solutions.	Refer to Matrix.
Bush Fire Report	A report which demonstrates how the development on bush fire prone land will comply with Planning for Bush Fire Protection 2019. The report must be prepared by a Bushfire Planning and Design Accredited Practitioner.	For certain developments (refer to matrix) on bush fire prone land.
Civil Engineering Plans	Detailed technical plans prepared by a qualified civil engineer that illustrate how essential infrastructure components will be delivered and integrated with the development. These drawings typically include: • Site grading and finished levels • Roadworks, footpaths, kerb and gutter • Stormwater drainage systems, pits and pipes • On-site detention (OSD) systems • Driveway and vehicle access design • Utility services layout (water, sewer, electrical conduits)	For developments involving **significant site works**, new public domain interfaces, alterations to road or drainage infrastructure, or where engineering certification is needed for stormwater or access.

Contamination Report/Remediation Action Plan	A report which assesses any site contamination and sets out a strategy to clean up the land to make it suitable for its intended use in accordance with the *State Environmental Planning Policy (Resilience and Hazards) 2021* and council's Contaminated Lands Policy. The report must be prepared by a suitably qualified geotechnical consultant.	Refer to Matrix.
Design Verification Statement	• A Statement prepared in accordance with Section 29 of the *Environmental Planning and Assessment Regulations 2021*. The statement must be prepared by a suitably qualified person. • Prepared by a qualified designer for a residential apartment development. The document confirms design quality principles and verifies the objectives of the apartment design guide have been achieved.	For residential flat buildings and shop top housing developments.
Efficient Use of Resources Commitment Table	This commitment table is to be completed for all development applications for commercial or mixed use developments that have a non-residential gross floor area less than 5000m².	For commercial developments and the commercial component of mixed-use developments.
Environmental Impact Statement	A report that outlines how the proposal could affect natural or built environments and suggests mitigation measures. Statement which complies with Part 8 of the *Environmental Planning and Assessment Regulations 2021*.	For developments classified as designated.
Flood Report	A report which demonstrates how the development on flood prone land will comply with Council's Floodplain Risk Management Study. The report must be prepared by a suitably qualified and experienced civil engineer.	For certain developments (refer to matrix) on flood prone land.
Fire Safety Schedule	A schedule that lists existing and proposed fire safety measures (e.g. alarms, hydrants, sprinklers) that must be installed and maintained in the building	Refer to Matrix.
Fire Safety Upgrade Report	A Report that outlines additional fire safety measures to bring older buildings into compliance with current fire safety standards.	Refer to Matrix.
Geotechnical Report	A Report that outlines ground stability, rock/soil types, excavation impacts. Required for basement levels, excavation near boundaries, or steep slopes. The report should be prepared by a suitably qualified geotechnical Engineer.	If the proposal includes a building addition and excavation below existing ground level.

Heritage Impact Statement	A document which assesses and manages the development's heritage impacts in accordance with The Burra Charter. The document must be prepared by a suitably qualified and experienced heritage consultant.	For developments involving: • heritage items or on sites within heritage conservation areas, • development within the vicinity of heritage items or heritage conservation areas, or • development within an identified significant view corridor
Photomontage	Image or 3D rendering showing the proposed building in its real-world context to help illustrate scale and visual impact.	Refer to Matrix.
Public Art Plan	Outlines the approach to integrating public art into major developments and aligning with any council art strategies or requirements.	Refer to Matrix.
Plan of Management	A plan that describes how ongoing operations (e.g. hours, waste, noise, deliveries) will be managed to limit impacts on neighbours or the public. The plan should demonstrate how a proposal will be managed to minimise adverse amenity impacts. A typical plan may include: • type of business • number of employees • expected number of customers or clients • hours and days of operation • number of patrons and building safety for entertainment venues • plant, machinery and production processes • type and quantity of goods handled • arrangements for transport, loading and unloading of goods • hazardous materials and processes • noise controls • complaints management • servicing arrangements	Refer to Matrix.
Reflectivity Report	A report that assesses the glare potential of building materials on pedestrians and drivers and recommends solutions if necessary.	Refer to Matrix.

Structural Engineer's Report	A report that assesses the stability and conditions of existing structures or supports proposed demolition. May be required for development proposals where the existing condition is used to substantiate demolition, damage or removal or as otherwise required by Council.	Refer to Matrix.
Section J Report	A report that outlines how a Class 2–9 building (non-residential or multi-unit residential) complies with Section J of the *National Construction Code (NCC)*, which deals with energy efficiency requirements for commercial and large residential buildings. The report is usually prepared by a qualified building consultant and includes: • Building fabric performance (insulation, glazing, thermal breaks) • Lighting and artificial ventilation requirements • Heating, cooling, and hot water system efficiency • Building sealing and energy metering provisions	When it's required: For all Class 2–9 buildings (excluding sole occupancy dwellings under 300m^2), to demonstrate compliance with national energy standards.
Social Impact Statement	An assessment which considers the social impacts of the development and assesses the effects of a development on local community wellbeing, services, and social cohesion.	For developments involving sensitive land uses in proximity to existing licensed premises, premises with gaming machines, sex services premises and restricted premises. Also, for developments involving licensed premises, premises with gaming machines, sex services premises and restricted premises in proximity to existing sensitive land uses.
Swept Path Diagrams	Diagrams which demonstrate that the largest vehicle that will access the site can manoeuvre into, through and out of in accordance with the Australia Standard 2890.	For developments that require access by commercial vehicles or those with restricted/difficult access.
Traffic Management Report	A report which assesses the traffic, access and parking impacts of the development upon the surrounding road and intersection network and models traffic generation taking into account the traffic generation from existing developments in the area. The report is to be prepared by a suitably qualified and experienced traffic engineer.	For larger scale developments, or those likely to be traffic generating.
Visual Impact Assessment	A report that identifies and determines the value, significance and sensitivity of a landscape and shared view corridors, and the developments' impacts upon it, in accordance with the *Land and Environment Court Policy: Use of Photomontages and Visualisation Tools*. The report is to be prepared by a suitably qualified view loss expert.	For developments that may compromise views to adjoining developments. Real Estate images will not be accepted. Focal length and lens size must be included within the imagery assessment. The use of Generative AI will also not be accepted.

Waste Management Plan	Explains waste handling during demolition, construction, and occupancy. Required for all DAs. Must include volumes, disposal locations, and bin access in accordance with Council's Waste Management Plan.	For all developments.
3D Building Height Plane	A Diagram which shows a 3D image of the development and a height plane showing the maximum building height development standard for the site. Contraventions must be clearly legible with annotations providing the extent of the contravention at each location.	For large developments with maximum building height development standard contraventions.

Additional Requirements

Naming Convention	**All plans and documentation must be named appropriately as shown below:** - **Documents** ○ Name of Report, Date of Report, Property Address - **Plans** ○ Name of Plan, Plan Number, Revision Number, Property Address	
Scale	Plans must be to scale of 1:100 @ A3, landscape	
Detail	Plans must show new/proposed work in colour	
Type	Hand drawn plans or scanned copies of previous plans are not accepted within a proposed plan set. All documents are to be electronic and saved as a PDF no larger than 300MB.	
Age of Documents	Council does not accept historic documents. Any document older than 3 months old will be required to be updated to reflect relevant planning controls and site conditions at the time of lodgement.
