APPLICATION INFORMATION MATRIX

Minor Residential and Other Development

Pursuant to Section 24 of the *Environmental Planning and Assessment Regulations 2021* and the NSW Department of Planning and Environment Application Requirements the details sought in the accompanying checklist must be provided. Failure to provide all required documentation at an acceptable standard will result in your application being returned.

Information	Dwelling Houses / Secondary Dwellings / Dual Occupancies / Studio Dwellings	Dwelling House Alterations / Additions	Subdivision	Outbuildings and Minor Works (including decks, awnings and the like)	Swimming Pools	Provided

● Information required	○ Information may be required (refer to Information Guide)			× Information not required		

Note. Council may require additional information to that listed in the matrix due to site constraints, unique development proposals and policy requirements. In addition, detailed assessment of your application may require the provision of additional information in accordance with Section 36 of the *Environmental Planning and Assessment Regulations 2021*. For advice contact Council on 9936 8100 or council@northsydney.nsw.gov.au.

Document Glossary and Information Guide

Information	Requirements	When is the Information Required?
Notification Plan	A4 (one page) site and elevational plan with applicant and site details, true north, date, and architect/draftsman. Required for developments that need public notification.	For all developments required to be notified in accordance with Council's Community Engagement Strategy
Owner's Consent / Party Wall Consent / Strata Consent	Signed consent from all owners of the land (or strata/body corporate if applicable). Required for all applications at the time of lodgement.	For all developments
Property Title	Titles and property certificates provide information about a specific parcel of land. Document is to include: Land ownership name (resisted proprietor), encumbrances, caveats and notices.	For all developments
ASIC Search	An ASIC search is a search of the Australian Securities and Investments Commission (ASIC) registers used to verify a company's legal status and obtain information such as its ACN, registered office address, directors, company history, and other corporate records.	Refer to matrix. Required to support owners consent.
Estimated Development Cost / Cost Summary Report	A genuine estimate of the development cost in accordance with Clause 6 of the *Environmental Planning and Assessment Regulations 2021*, Planning Circular PS 24-002 and Councils Development Application Cost Summary	Refer to matrix
Statement of Environmental Effects	The statement must: • describe the site and development, • detail the development's consistency with all applicable legislation, environmental planning instruments and policies, • describe the likely environmental impacts of the development, and • describe how the development will mitigate the likely environmental impacts	For all developments. Modifications must clearly consider Section 4.55 including the relevant subclause, identify all conditions to be modified and where required, propose alternative wording. SEE's must be prepared by a suitably qualified professional.
Clause 4.6 Variation Request	Where a proposal doesn't comply with the development standards in the *North Sydney Local Environmental Plan 2013*, Council may consider an exception where strict compliance is unreasonable or unnecessary.	Refer to Matrix
Survey Plan	Prepared by a registered surveyor showing site boundaries and fencing, existing structures, RLs, easements, adjoining structures/heights, windows. Council's practice is to only consider survey's that	Refer to Matrix

	are accurate and reflect existing site conditions. Historic surveys will not be accepted.	
BASIX Certificate	A certificate which certifies that the development will comply with the NSW Government's energy and water reduction targets subject to certain commitments. All BASIX commitments that the certificate states must be shown on the proposed plans for the development, and prepared in accordance with the requirements of the *State Environmental Planning Policy (Sustainable Buildings) 2022*.	For residential development excluding renovations to an existing dwelling with a value less than $50,000 and swimming pools or spas with a capacity less than 40,000 litres as per the definitions within the *Environmental Planning and Assessment (Development Certification and Fire Safety) Regulation 2021*.
Site Plan	Must show site boundaries, contours, buildings/vegetation, demolition, easements, driveways, dimensions and structures on boundaries.	For all developments
Demolition Plan	A plan which details all buildings and structures to be demolished clouded/outlined in red.	For developments that include demolition
Floor Plans	Show all levels, dimensions, room names, finished floor levels (RLs). Required where new work or buildings are proposed.	Refer to Matrix. Existing and proposed plans must be provided
Elevations and Sections	Required for all new buildings. Include all sides, RLs, roof heights and existing/proposed ground levels, cross sections and long sections included.	For all developments. Existing and proposed plans must be provided
Shadow Diagrams	Show 9am, 12pm and 3pm shadows on 21 June (winter solstice). For larger or more constrained sites, sun eye or hourly diagrams may be required.	For developments ≥ two storeys high that will impact upon surrounding residential development and residential developments where compliance with solar access requirements is unclear.
Materials and Colours Details	Required where new external works are proposed. Provide schedules and sample images. For larger developments, a materials board and or 3D physical model may be required.	Refer to Matrix
Landscape Plans	Prepared by a qualified landscape professional. Shows tree retention/removal, new planting, surface treatments, levels, fences and drainage. The Plan should also include plant species, number and pot size.	For post consent requirements any Landscape Plan should include engineering and planting specifications (for street tree plantings refer to

	The Plan should also consider both replacement of canopy trees removed and planting of new canopy trees where appropriate.	Council's Engineering Specifications).
Stormwater Drainage Plan	A plan which shows the development's method of stormwater drainage and includes contours (to Australian Height Datum). The plan should identify the strategy for managing stormwater runoff on site including detention, discharge points, and any required easements.	Refer to Matrix
Erosion and Sedimentation Control Plan	Details how the site will be managed to prevent stormwater pollution, erosion and sedimentation.	Refer to Matrix
Subdivision Plan	A plan prepared by a Registered Surveyor in accordance with the *Surveying and Spatial Information Act 2002*. The proposed subdivision layout should demonstrate how a site will be subdivided including lot boundaries, dimensions, and service infrastructure. Should be accompanied by a Draft Instrument for easements, and include: • Existing and proposed lot boundaries • Relationship of the lot(s) to existing roads • Proposed boundary dimensions (metres) and lot areas (square metres) • Preliminary engineering drawings of any work to be carried out under Subdivision Works Plan/Certificate (refer requirements for Civil Engineering drawings) • Proposed easements and rights-of carriageway including any party wall • Conceptual, existing and/or approved building footprint(s)	For existing lots, the application is to confirm that no subdivision works are required as a result a of the proposal, i.e stormwater, sewer or internet cables or easements for services. For new subdivisions that require a SWC, engineering and service plans should be provided to support the proposal. For stratum subdivisions, documentation should also include a copy of the draft agreed building management statement that details the agreed easements for emergency egress and shared fire services.
Arborist Report	A report which assesses the impact of the development including proposed stormwater, upon existing site, neighbouring and public trees. This report assesses tree health and outlines the impact of development and construction on trees, including recommendations for retention or removal and tree protection requirements as per the relevant Australian Standard for tree protection on construction sites. The report needs to consider construction methods, including of hoardings, scaffolding and delivery of material and equipment on site, pruning specifications and likely requirements for construction zones.	Refer to Matrix

	The report must be prepared by an Arborist with a minimum Level 5 Diploma in Horticulture (Arboriculture) or AQF Level 5 in Arboriculture and $2 million professional indemnity insurance.	
Bush Fire Report	A report which demonstrates how the development on bush fire prone land will comply with Planning for Bush Fire Protection 2019. The report must be prepared by a Bushfire Planning and Design Accredited Practitioner	For certain developments (refer to matrix) on bush fire prone land
Flood Report	A report which demonstrates how the development on flood prone land will comply with Council's Floodplain Risk Management Study. The report must be prepared by a suitably qualified and experienced civil engineer.	For certain developments (refer to matrix) on flood prone land
Geotechnical Report	A Report that outlines ground stability, rock/soil types, excavation impacts. Required for basement levels, excavation near boundaries, or steep slopes. The report should be prepared by a suitably qualified geotechnical Engineer.	If the proposal includes works or excavation below existing ground level.
BCA Report / Upgrade Report	A Report prepared by a certifier to confirm the building will comply with the National Construction Code performance requirements or justify any alternative solutions.	Refer to Matrix
Heritage Impact Statement	A document which assesses and manages the development's heritage impacts in accordance Council's planning controls. The document must be prepared by a suitably qualified and experienced heritage consultant.	For developments involving: • heritage items or on sites within heritage conservation areas, • development within the vicinity or the curtilage of heritage items or heritage conservation areas.
Visual Impact Assessment	A report that identifies and determines the value, significance and sensitivity of a landscape and shared view corridors and the developments impacts upon it, in accordance with the *Land and Environment Court Policy: Use of Photomontages and Visualisation Tools*. The report is to be prepared by a suitably qualified view loss expert.	For developments that may compromise views to adjoining developments. Real Estate images will not be accepted. Focal length and lens size must be included within the imagery assessment. The use of Generative AI will also not be accepted.
Waste Management Plan	Explains waste handling during demolition, construction, and occupancy. Required for all DAs. Must include volumes, disposal locations, and bin access in accordance with Council's Waste Management Plan.	For all developments

Additional Requirements

Naming Convention	**All plans and documentation must be named appropriately as shown below:** - **Documents** ○ Name of Report, Date of Report, Property Address - **Plans** ○ Name of Plan, Plan Number, Revision Number, Property Address	
Scale	Plans must be to scale of 1:100 @ A3, landscape	
Detail	Plans must show new/proposed work in colour Any modification applications must be clearly detailed on plans, and either colour coded or clouded in red Any approved works, or works obtained under a different consent pathway should also be clearly identified on plans	
Type	Hand drawn plans or scanned copies of previous plans are not accepted within a proposed plan set. All documents are to be electronic and saved as a PDF no larger than 300MB	
Age of Documents	Council does not accept historic documents. Any document older than 3 months old will be required to be updated to reflect relevant planning controls and site conditions at the time of lodgement.
